VIVIEN CHAVEE

Senior Software Engineer – Java / Spring / Generative AI

chaveev@gmail.com · linkedin.com/in/vivienchavee
France · Full remote preferred (hybrid possible)

PROFILE

15 years of experience building Java / Spring Boot and React applications handling large data volumes, in international teams. I also build generative AI applications (Claude API, RAG, MCP) and wrote "Token Optimization for GitHub Copilot", an internal guide shared with several thousand colleagues. Quality (TDD/BDD, code reviews) and knowledge sharing every day.

ARTIFICIAL INTELLIGENCE

- "Token Optimization for GitHub Copilot" (July 2026): internal guide shared with several thousand colleagues, which prevented token quotas from running out in the first week.
- GitHub Copilot daily: AI-assisted development.
- DevGym (JavaScript): coding quizzes and training, answers graded through the Claude API.
- RAG chatbot (Python, Pinecone vector database), prototype.
- Job-search assistant (Node.js, LinkedIn MCP, Claude API): offer scoring and analysis.

PROFESSIONAL EXPERIENCE

Software Engineer · Société Générale — 2017 – present

Consultant 2017–2020, employee since 2020 · Paris–Bangalore teams

Nova · Team of 14, 7 of them in Bangalore — 2025 – present

- Rating application for non-retail clients exposed to financial and climate risks, used internationally.
- Java 21, Spring Boot 3.4, React 18: back end, front end and DevOps (IaC, Jenkins / Kubernetes deployment).

Certification Factory · Team of 13, 6 of them in Bangalore — 2023 – 2024

- Cloud rebuild of SAFIR, delivered in 2 years starting from scratch on an entirely new stack: React, TypeScript, PostgreSQL, Databricks, AWS.
- Back end and front end, delivery through Jenkins. Migrated several hundred users (up to about 1,000); hundreds of millions of records processed.

SAFIR · Team of 9, 3 of them in Bangalore, within an IS of 6 teams sharing the same components — 2017 – 2023

- Java 8 web service computing RWA (equity) in TDD/BDD; Risk Weights on asset tranches under heavy performance and volume constraints.
- Owner of the QURE (Quality Review Engine) scope: quality control of credit tranches on a given perimeter.
- Optimised a batch from 4 h to 20 min (SQL fixes, fewer Java loops).
- Adjustment UI changes, calculators, tranching services, reference-data loaders; SQL and shell scripts.

Cross-team

- Daily code reviews; one-to-one mentoring of new joiners.
- Designed a Java microservices architecture, consistent with the IS and separating responsibilities.

Java Developer / Loan IQ · BNP Paribas CIB — 2014 – 2017

Assignment through 42Consulting

- Migrated Loan IQ v6 to v7 with no regression or incident; built automation tooling (Jenkins, Maven, Nexus, Sonar).
- Migrated loans from Uniloan to Loan IQ: migration tool built in a team of 6 (Spring Batch, TestNG, Ehcache).

Lead Developer, then Java Developer · 42Consulting — 2011 – 2018

Work-study (Epitech) 2011–2014, then employee until 2018

- Lead Zend developer on NERD, an internal company platform: team of 3, specifications, acceptance testing, production release, SQL training delivered to consultants.

SKILLS

Back end Java 8–21, Spring Boot, Spring Batch, REST APIs, microservices

Front end React 18, TypeScript, JavaScript

Testing & quality JUnit, TestNG, TDD/BDD, SonarQube, code reviews

DevOps / Cloud Jenkins, GitHub Actions, Kubernetes, IaC, AWS, Git, Maven

Data PostgreSQL, Databricks, Oracle, Teradata

AI GitHub Copilot, Claude API, RAG (Pinecone), MCP

EDUCATION

Master's-level degree "Expert en technologies de l'information" (5 years, RNCP level 7) — Epitech · 2008 – 2014

Exchange year — Universidad de Huelva (Spain) · 2012 – 2013

French general baccalaureate — Lycée André Boulloche · 2008

LANGUAGES · INTERESTS

French: native · English: fluent, daily professional use · Spanish: fluent

Boxing, video games (building small games as personal projects)
